ABOUT US

Suntech Electric and Controls Ltd. is an Electrical, Automation and Instrumentation contractor based in Calgary. Supporting Southern Alberta since 2013. We offer around the clock service for all your electrical needs. Suntech Specializes in **Water and Wastewater Treatment** and our team has a vast amount of experience ranging from large industrial plants, oil and gas, food and beverage, packaging, brewery, distilleries and commercial properties including retail.

Energy efficiency can be achieved in many ways and we are here to help our customers save money.

We can assist in integration of Variable Frequency Drives (VFD) for our manufacturing customers to save costs on energy and allowing machines to ramp up, hard starting equipment with contactors adds increased mechanical maintenance.

We have lots of experience assisting our **brewery and distillery** customers navigate CSA certification with imported equipment and making process changes to PLC controllers designed out of country.

Water and Wastewater controls and instrumentation are ever evolving and we want to help municipalities and industrial water clients integrate solutions to meet and exceed regulatory requirements.

OUR SERVICES

Industrial Specialization

Suntech Electric and Controls Ltd. provides industrial electrical services throughout Calgary and Alberta. Providing 24/7 emergency technical services to our customerbase has allowed us to grow our business by word of mouth.

- Water and Wastewater
- Materials Handling and Logistics
- Manufacturing and Machine Shops
