

WATER TREATMENT OPERATOR (Level 1 or 2)

LambWeston Canada ULC - Taber, AB

ABOUT US:

Lamb Weston is North America's largest frozen potato company, happily delivering the delicious goodness of fries to more than 100 countries. When we look at a potato, we see possibilities.

Our Taber plant is looking for a new team member that is dedicated, hardworking and ambitious to help us continue to perform at the highest level possible and achieve our goals. You will be challenged to take responsibility, drive results, show creativity, and display initiative - and you will be rewarded for your contributions and impact.

When you choose a career with us, every day is fry-day!

POSITION SUMMARY:

Our Water Treatment Operators perform skilled work in monitoring and controlling operations of the Water & Wastewater Control Systems, working under supervision. Experience working with a GE-Ultra Filtration Membrane System is an asset. This position will be required to work any shift and/or any day of the week in accordance with production schedules. Level 2 Certification in Water Treatment is preferred, however a candidate with Level 1 Certification and working towards Level 2 may be considered. Level 1 Certification in Wastewater Treatment is required.

JOB DESCRIPTION:

Essential duties and responsibilities include but are not limited to, the following. Other duties may be assigned.

- Maintains consistent treatment to limits set for land applications, and clear interaction and communication with the Utilities Supervisor.
- Must have a knowledge of irrigation wastewater systems.
- Support Management and employees' efforts to optimize manufacturing efficiencies and promote continuous improvement.
- Work with Supervisory staff and safety committees to develop and implement safety improvements.
- Keeps regular records of meter and pumps operations, ensuring proper operation and daily management of a process water treatment system.
- Collect, process and record various samples and information, including, but not limited to flow and chemical composites.
- Responsible for operations, monitoring and maintenance of the Process and Wastewater Treatment Systems to ensure effective operation.
- Responsible for operating and maintaining Anerobic Digester.

- Maintains/Promotes safe work practices at all times. Must have a complete knowledge and understanding of the plant safety rules including lockout-tag out procedure and chemical hazards.
- Understands and follows all plant Good Manufacturing Practices (GMPs).
- Coordinates with production supervisory personnel on changes in water requirements to help insure maximum plant productivity.
- Assists in supervisors in training of new utility operators.
- Assists in coordination of ordering parts and supplies for R & M.
- Fill out, maintain, and sign all applicable documentation and administration forms for verification purposes.
- Change Chlorine Tonners as required.
- Other duties as assigned by Utility supervisor and requested by supervisors of other departments, such as janitorial duties.
- Remove any foreign material found during transfers and notifies supervisor immediately if glass or metal is found.
- Communicates with operators, sanitation leaders and supervisors to keep abreast of downtime maintenance activities, and to keep abreast of production activities.
- Maintain sanitation in the work area as needed.
- Clean water treatment areas as determined necessary (using the designated cleaning equipment and supplies as well as a high-pressure water hose).
- Notify supervisors and sanitation leaders when repair work in the production area is completed.

PREREQUISITES:

To perform this job successfully, an individual must have acceptable work performance; must have demonstrated safe work practices and have a safe work record; satisfactory attendance; and be able to safely perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

- High school diploma or general education degree (GED).
- Strong computer application skills, MS Office, CMMS systems (SAP, Maximo, or equivalent) and excellent Excel skills.

LANGUAGE SKILLS

- Ability to read and interpret documents such as safety rules, operating and maintenance instructions, and procedure manuals.
- Ability to write routine reports and correspondence. Ability to speak effectively before groups management, supervisor, and fellow co-workers in organization.

MATHEMATICAL SKILLS

Ability to apply concepts of basic algebra, geometry and mathematics required to calculate interest, proportions, percentages, area, circumference, and volume.
