Water & Wastewater

Practicum Placements Needed

Are you planning to hire staff for the upcoming May-August 2023 season or looking to fill future vacancies within your organization?

NAIT's Water and Wastewater (WWW) Technician students are required to obtain a minimum of **600 hours** of work experience in one or more of the following disciplines: water treatment, water distribution, wastewater collection and wastewater treatment; to complete their certificate.

Approximately 70 students will be seeking employment to complete the industry practicum portion of the program. With your support, we hope to provide our students with a variety of employment opportunities paid or volunteer on January 30, 2023.
