

Pool and Water Systems Operator (I/II)

Who We Are:

Gleniffer Lake Resort & Country Club is a premier resort destination, offering a well-maintained and relaxing environment for lot owners and guests. Our pools and aquatic facilities are an essential part of the resort experience, and we take pride in maintaining them to the highest standards of safety, cleanliness and efficiency.

The Position:

We are looking for a Pool and Water Systems Operator (I/II) to join our team. This role is responsible for maintaining the resort's pools, ensuring water quality, safety, and compliance with health regulations. Additionally, the operator provides backup support for the operation and maintenance of the water and wastewater systems. The ideal candidate will have experience in pool operations, water treatment, and wastewater management.

What We Offer:

We provide a rewarding work environment with opportunities for professional growth and benefits, including:

- Competitive hourly wages
- Staff incentives and rewards
- Career development opportunities
- A supportive and team-oriented work culture

What You'll Be Doing:

Pool Operations and Maintenance

- Conduct daily inspections of pool facilities, including testing water quality (pH, chlorine, alkalinity).
- Adjust chemical dosing to maintain proper water safety standards.
- Perform routine pool maintenance, including vacuuming, cleaning skimmer baskets, and checking equipment.
- Monitor and manage chemical tanks, ensuring appropriate levels of sodium hypochlorite and hydrochloric acid.
- Ensure pools are properly maintained, secure when not in use, and compliant with safety regulations.
- Collect and submit weekly bacteriological samples to Alberta Health.
- Assist with seasonal pool openings and closings.

Water & Wastewater System Support

- Assist in monitoring and operating water treatment systems, ensuring proper chemical dosing and compliance with regulations.
- Collect and test water samples for chemical and bacterial content, maintaining accurate logbooks.
- Monitor computerized control systems and assist with troubleshooting water treatment equipment.
- Support the operation and maintenance of wastewater treatment systems, including aerators, UV disinfection, and lift stations.
- Conduct routine inspections and minor repairs on wastewater collection systems.
- Ensure compliance with environmental and health standards in water and wastewater operations.

Compliance & Safety

- Follow all Occupational Health and Safety (OHS) guidelines and procedures.
- Safely handle and store chemicals in compliance with regulations.
- Participate in emergency response exercises and safety drills.
- Assist with reporting and maintaining records related to water, wastewater, and pool operations.
- Respond to inquiries or concerns related to pool, water, and wastewater systems.

What You Need to Be Successful:

- High school diploma or equivalent (GED or official transcript).
- Level I or II Water & Wastewater Certification.
- Certified Pool Operator Level 1 (AARFP) certification (preferred or required to complete).
- Strong understanding of water treatment, wastewater processes, and pool operations.
- Ability to work independently and troubleshoot technical issues.
- Proficiency in Office 365 and industry-related software.
- Valid Class 5 Alberta Driver's License and reliable transportation.
- Comfortable working outdoors in various weather conditions.
- Availability for flexible hours, including evenings, weekends, and on-call shifts.

Availability:

- Full-time position.
- Must be available for early morning, daytime, and occasional evening, weekend and on-call shifts.

Compensation:

- Competitive hourly wage based on experience
- **You must be legally eligible to work in Canada.**

We are committed to diversity and inclusion. If you have the skills and experience, we encourage you to apply and be part of our team!
